EDUCATION —

FPT Ho Chi Minh University 09/2019 - Present Software Engineering Major GPA: 8.7/10 (Semester 4/9)

- KEY SKILLS -

Programming Language DevOps

- Javascript (Typescript)

- Docker

- Java - C#

- Nginx

- Python NodeJS

Database

- ExpressJS

- Microsoft SQL

- NestJS

- MySQL

- Socket.io

- MongoDB

- Jest

- Redis

Knowlegde

- Understanding about OOP, SOLID principles

- Design database, design RestfulAPI

- Time management, teamwork, communication

PERSONALITY HIGHLIGHTS

BACKEND DEVELOPER

CAO CHI HAI

Self taught | Motivated by problem solving | Energetic

PROJECT -

o2/2021-05/2021 **MyChess**/My project

https://github.com/Heaty566/mychess

My chess is an online website game that allows people to play chess or tic tac toe in real-time. This project focuses on handling real-time when many people are playing simultaneously and reducing the delay as much as possible.

∗Team size: 3

*My role: Back-end developer, Tester

*Front-end: NextJS, Redux-tookit, React-Hook-Form, Tailwind

*Back-end: NestJS, Socket.io

*Database: MySQL, Redis

05/2021-07/2021 SanninSC Hote /School project

https://github.com/tantruong2303/booking-hotel

SannincSC Hotel is a website that allows the manager to provide booking services online for customers. This project was final asssignment project for Java Web Application Development course. Besides a focus on implementation, we were also spending time on the documentation. We got 9.5 for both.

∗Team size: 3

*My role: Back-end developer

*Front-end: JSP, Tailwind, jQuery

*Back-end: Java Servlet *Database: Microsoft SQL

• 09/2021-11/2021 Mono Store/School project

https://github.com/MonoInfinity/mono-shopping-store-be

Mono Store is a system that provides service for a supermarket. The system includes a management website for managers, cashiers, owners, and shippers to work, manage, and view independently. Moreover, the system has a website for customers to purchase online, optimized for SEO, and a better loader.

*Team size: 5

*My role: Back-end developer, Tester

*Front-end: NextJS, Redux-tookit, React-Hook-Form, Tailwind

*Back-end: .NET

*Database: Microsoft SQL
